# DISCOVER WHAT'S NEW: +79 PRODUCTS, COUNTLESS POSSIBILITIES

2026

Each one crafted to solve real-world production needs — specifi ally tailored for your die & mould projects!

**FAST, DIRECT, AND COMPREHENSIVE SUPPORT**

TECINMAR's unique range of standard components includes the right solution for nearly every application – and when not, custom support is available. All parts bearing the TECINMAR quality assurance mark are produced with a focus on high value and reasonable pricing, offering optimal support throughout the design and procurement process.

## GUIDING COMPONENTS

From DLC-coated pillars for injection moulds, to new-generation rollers and linear system bushes — including newly stocked WDX-standard wear plates for Ford projects — we offer a wide range of innovative new solutions.

## MECHANICAL DIE COMPONENTS SOLUTIONS

Our updated range now includes new guides, roller strip lifters, and coil supports—engineered for precision and durability. All components are available at competitive prices to support your tooling requirements efficiently.

## STAMPING SOLUTIONS

Discover our latest innovations — including NAAMS-standard matrixes, ball-lock special retainer inserts, heavy-duty headed punch retainers, punch stripper units, removable multi-change punch retainers, and pneumatic retractable punch systems — engineered to meet the evolving demands of modern stamping applications.

## SPRING SYSTEMS

Discover new high-performance CHT and CSMHT gas spring series—developed specifically for hot forming and injection mould applications. Now also available: our compact Mini Series round wire springs, ready to ship from stock.

## ADVANCED ADDITIONS FOR INJECTION MOULD DESIGN AND MANUFACTURING

We have expanded our stock with a wide range of newly developed components engineered to optimize injection mould design and production workflows. These additions offer increased precision, durability, and efficiency for high-performance tooling applications.

## NEW OPPORTUNITIES IN TOOLROOM EQUIPMENT & CHEMICALS

Explore our newly developed high-temperature grease—engineered to withstand up to 1400°C—specially formulated for SBMAV03 series ejector pins. Also available: our cost-effective general-purpose cleaning spray. For your toolroom workholding operations, discover new TECINMAR quality products designed to deliver reliable performance at competitive prices.

## QUICK GUIDE TO NAVIGATING THE TECINMAK CATALOGUE

**This section is designed to help you maximize your use of our catalogue — from using the indexes and understanding page layouts to identifying newly added products**

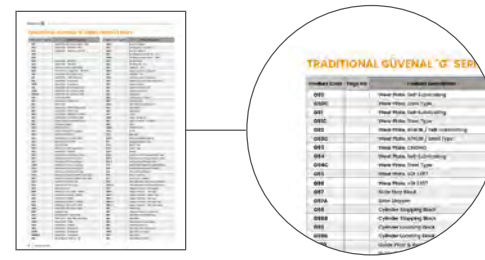

### 1. **Category Index**

Quickly access the main product group of interest (e.g., Category 2: "Guiding Components"). The catalogue includes 18 distinct categories, each numbered and marked with a unique colour for easy identification.

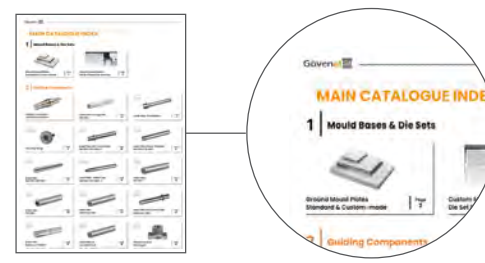

### 2. **Traditional TECINMAK "G" Series Index**

Allows you to quickly locate our products using the well-known TECINMAK "G" codes.

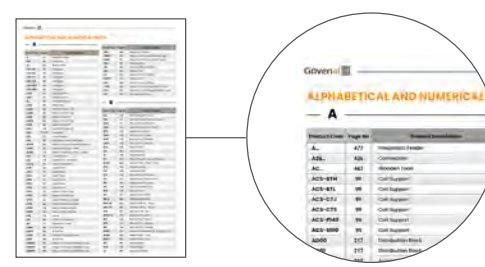

### 3. **Main Catalogue Index**

Follow the sequence of all listed products in the catalogue to easily navigate and locate the desired product series.

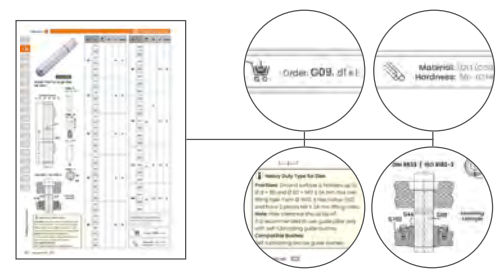

### 4. **Alphabetical and Numerical Index**

Allows you to quickly access our products, which are categorized using letter and number combinations.

### 5. **Page Layout**

Includes technical data, usage instructions, mounting guidelines, and how to choose the correct order code.

### 6. **NEW Tag** NEW

Look for the NEW symbol to discover the latest additions and innovations in our product range. These products have been recently introduced to our portfolio and were not included in previous editions of the TECINMAK catalogue.
